

CFI is an all encompassing consulting and systems integration firm working exclusively for real estate and facility management organizations. With over 1.5 billion square feet of facilities solutions implemented, we deploy only the most qualified and accomplished experts in the field. CFI is uniquely structured to meet the needs of both a mid-sized business looking for a single, specific service offering or a multi-million dollar corporation that needs a full circle, end-to-end package of services including consulting, implementation, and on-going support.

CFI's Business Offerings, either deployed in your environment or provided as a part of our Bundled Services:

- Strategic Consulting Services
- Implementation Services
- Support Services
- Bundled Services

Real Financial Results:

Customer #1 saved 3 FTE's previously dedicated to project budget reporting by consolidating Excel spreadsheets into their web-reporting portal.

Customer #2 reduced their MAC transaction costs by 59% by leveraging CFI's off-the-shelf FAST/MAC application. The project cost about \$120,000 and took five months from start to finish.

Customer #3 saved over \$100,000 per year and increased their response rates from 55% to 98% by leveraging a web-based, automated survey for their annual space use survey.

Customer #4 saved over \$350,000/year in ad-hoc credit card purchases of materials and tools that became part of an inventory management program that not only leveraged AT&T's buying power, but also ensured accurate inventories of parts and material for operations.
